

Report - Excursion to Parle G Factory

Date- 11.03.2025

Classes-5 to 8

As part of our educational curriculum, students from classes 5 to 8 visited the Parle-G Confectionery and Biscuit Factory on 11.03.2025. The objective of the visit was to gain insight into the production process of biscuits and confectionery items, understand quality control measures, and learn about the role of automation in the food industry.

The tour was divided into two sections: Biscuit Manufacturing and Confectionery Production. Students learned about both the processes in detail through power point presentations followed by a tour of the factory to gain first hand experience.

During the tour, factory officials explained the importance of hygiene, safety protocols, and quality checks in food production. Students were fascinated by the high-speed automated machinery used in both biscuit and candy manufacturing.
