GOLE MARKET NEW DELHI
ANNUAL PLANNER
CLASS:PRE PRIMARY
SESSION - 2022 - 2023**

The early years of childhood constitute the most significant period of life , because this is when the foundations are laid for motor , sensory , cognitive , language , social and personality development. Early Childhood Education Curriculum is a wide range of activities designed to assist the overall development of children.

We often think of curriculum as to what is being taught in the classroom i.e . a list of subject and a set of syllabus but this definition of curriculum is not appropriate for Nursery and Pre - Primary classes . These children are learning while playing , eating and even during washroom time . So every part of the school day is planned to help the children learn and develop intellectually , physically , socially and emotionally.

We have designed an innovative curriculum for Pre - Primary with an objective of reinforcing concepts , ideas , skills and activities .

We have broadly devised an Annual Programme and some of the suggested activities to help your child achieve the learning objectives set up for Pre - Primary . For exact details you may refer to the Monthly Plan.

1. LANGUAGE SKILLS - The main goal of the language curriculum is to enable the to communicate with other people .
There are four major skills that a child should have in order to . . . communicate.
