

Special Assembly on “Galactics”

On 16th October 2024, our school organized a special assembly on the theme of “Galactics.” The students of Class VB presented a short skit based on this theme. The assembly aimed to broaden students’ understanding of the vastness of space, galaxies, and the mysteries of the universe. The assembly was a great success, leaving students fascinated by the wonders of galaxies and the mysteries of the universe far beyond our own.
