

Report on “Budding scientist”

On October 18, 2024, our school hosted the *Budding Scientist* event for students in classes 3 to 8, where young science enthusiasts showcased their creativity and scientific knowledge. Students prepared experiments and science models, demonstrating their understanding of scientific principles in engaging ways. The event provided an interactive platform for students to explore and explain concepts ranging from magnetism and electricity to environmental science and chemistry. Three winners from each class were selected based on creativity, accuracy, and presentation skills, celebrating their talent and enthusiasm for science. The Budding Scientist event not only enriched students’ knowledge but also fostered a spirit of curiosity and discovery.
