Report on Special Assembly on Robotics by Class VI

Class VI conducted a special assembly on Robotics, showcasing the growing role of robots in daily life and various industries. The presentation featured RoboMax, an advanced robot assisting with household tasks, and highlighted robotics in healthcare, manufacturing, space exploration, and defence. Through engaging dialogues, students addressed the benefits, ethical concerns, and future potential of robotics.

The assembly concluded with the message that responsible innovation can help humans and robots work together for a better future. The assembly was both informative and thought-provoking, sparking curiosity about technology among students.
