

Report on Science activity " WHAT IF "

Dated. 21 April 2023

Classes- 3 to 5

" WHAT IF " questions are prompts to ask students that give thought provoking answers. An activity was conducted in the class in which students were asked to make science related questions begin with " WHAT IF ", two days before. These questions were asked in the class that gave other students something significant to think about. Each and every student shared inputs to answer these questions which enhanced their creative, critical and innovative thinking skills. It helps in building their scientific temperament.
