

Report on Visit to Nehru Planetarium

Classes 3 to 8

On 5.08.2025, the students of Classes 3 to 8 visited the Nehru Planetarium as part of an educational field trip aimed at enhancing their understanding of space and astronomy. The visit was both informative and exciting, offering students a unique opportunity to explore the wonders of the universe beyond the classroom.

During the sky show, students learned about various constellations, the solar system, and the origin of the Milky Way galaxy. The engaging visuals and informative narration helped them understand these complex topics in a simple and enjoyable manner.

The visit sparked curiosity and interest in the mysteries of the universe, making it a memorable and enriching experience for all.
