

Report on Special assembly World science day, 10.11.25

On World Science Day, our school staged a skit in a special morning assembly, showcasing scientific curiosity and experimentation. Students creatively depicted the theme "Igniting Curiosity" through a fun and interactive performance. The highlight was a "Scientific Magic" experiment where they used vinegar and baking soda to inflate a balloon, demonstrating chemical reactions and gas production. The skit engaged the audience and inspired young minds to explore the wonders of science!
